

## Instructions for Accessing Sanborn Maps through Remote Access

Using internet explorer 7 immediately triggers the "Invalid card number entered" error and won't prompt you to enter your barcode even after you click on the "click here to allow scripted windows" link. To remedy this:

1. Go to tools and choose internet options
2. Click on the Security tab
3. Click on trusted sites and add your site's domain name (i.e. <http://jpl.coj.net>) and click add
4. Click ok, and log into Sanborn Maps
